

# CLP-AQ

*Air Handler*

1.5 - 3 Ton Cooling or Heat Pump  
Up to 55,000 BTUH Hydronic Heating

# CLP-AQ

Today's higher efficiency air handlers are typically too large to fit into many smaller, space constrained closets. The **CLP-AQ** Series air handler is specifically designed to solve this problem. In addition, it's short height (less than 30"), makes it ideal for those applications where the closet space is minimal.

Return air (ducted or free) can come from the left side or the right side of the cabinet (determined by looking at the front of the cabinet) and must be identified at the time of order entry.

A high efficiency coil is factory installed on either side of the cabinet, and is available with a factory installed R-410A TXV. A 1" disposable filter is also factory installed within the cabinet and is easily accessible.

These fan coils are compatible with any source of hot water that does not exceed 180° and is NSF/ANSI certified for use with domestic water.

## STANDARD FEATURES

- Less than 30" tall
- Right or left hand return air (order must specify)
- Compatible with most major brands of condensing units and heat pumps (see (1) above)
- Hot water coil with circulating pump and hot water check valve
- High efficiency copper tube / aluminum fin coil with a factory installed R-410A TXV
- 120V motor, 24V controls
- Coil drain pan is coated with insulation to reduce corrosion
- Painted cabinet
- Factory installed hanger flange for wall mounting
- Easily accessible 1" disposable filter
- Shipped with wall mounting bracket

Typical installation over a Through the Wall  
Condensing Unit or Heat Pump

*First Co's customer is ultimately responsible for confirming which fan coil models are compatible with selected outdoor unit(s) and which expansion valves (if any) are required. To determine certified indoor/outdoor combinations, go to [www.firstco.com](http://www.firstco.com) or contact the factory.*

Drain Connections:  
Primary 3/4" MPT  
Secondary 3/4" OD Sweat
