First Co.’s customer is ultimately responsible for confirming which fan coil models are compatible with selected outdoor unit(s) and which expansion valves (if any) are required. To determine certified indoor/outdoor combinations, go to www.firstco.com or contact the factory.

In keeping with its policy of continuous progress and product improvement, First Co. reserves the right to make changes without notice.

NOMENCLATURE

FULL SERIES NOMENCLATURE

Model specific NOMENCLATURE presented at each respective section of document.

CL SERIES

CLOSET FAN COIL

FEATURES

Today's higher efficiency air handlers are typically too large to fit into many smaller, space constrained closets. The CL Series air handler is specifically designed to solve this problem. In addition, it's short height (less than 36"), makes it ideal for those applications where the existing air handler is located over an electric water heater. These upflow air handlers are designed for use with today's higher efficiency split-system condensing units and heat pumps.

All CLX fan coils include a high efficiency constant torque ECM motor. These motors offer the efficiency of a variable speed type ECM motor, but at a considerably lower cost. ECM motors are up to 33 percent more efficient than PSC motors at the rated operating speed.

Return air (ducted or free return) can come from the left side or the right side of the cabinet (determined by looking at the front of the cabinet) and must be identified at the time of order entry.

A high efficiency coil is factory installed on either side of the cabinet, and is standard with a factory installed TXV. A 1" disposable filter is also factory installed within the cabinet and is easily accessible.

Units ordered for R454B (Option B) and R32 (Option C) are factory configured with TXV or piston and factory installed refrigerant sensor.

Field convertible units (Option Z) are configured for R454B and R32 refrigerants with a factory installed refrigerant sensor. TXV kits are available.

STANDARD FEATURES

- Less than 36" tall
- Right or left hand return air (order must specify)
- Compatible with most major brands of condensing units and heat pumps (see (1) above)
- Up to 10 kW of electric heat
- High efficiency copper tube / aluminum fin coil with factory installed TXV (non-bleed type)
- 240V motor, 24V controls
- Coil drain pan is coated with insulation to reduce corrosion
- Factory installed hanger flange for wall mounting
- Easily accessible 1" disposable filter
- Shipped with wall mounting bracket

CL SERIES

CLOSET FAN COIL

FEATURES (CONT'D)

IMPORTANT NOTE

All Z model units ship with factory-installed refrigerant sensor. Field installed TXV must be compatible with A2L refrigerant being used. Failure to maintain use of refrigerant sensor may result in unit damage, property damage, and/or death. Warranty will be void.

EXPANSION VALVE KITS (HEAT PUMP OR COOLING ONLY)

PART NUMBER	DESCRIPTION
9EVR454B-5A	CL* R454B TXV (For Z options only)
9EVR32-5A	CL* R32 TXV (For Z options only)

NOTES:

1. Above expansion valve kits are approved for both cooling only (non heat pump) or heat pumps applications.
2. Valves are non-bleed type. Field added. Hard start kit may be required.
3. Valves have screw-on connections.

1. Heat BTUH is at 70°F entering air temperature.

2. Based on 20°F Delta-T. Velocity not to exceed 4ft./sec.

Drain Connections:

Primary 3/4" NPT

Secondary 5/8" OD Sweat

Typical connection to
Tank-Type Water Heater
