

CW(X)-HW

*Commercial Chilled Water Closet Fan Coil
with Hot Water or Electric Heat*

CW-HW PSC Motor Options

CWX-HW ECM Motor Options

CW(X) ECM MOTOR OPTION

This new ECM motor option includes 24V controls, a constant torque, permanent magnet, brushless DC motor, with 4 discrete speed taps that allow for precise air balancing.

The CW(X) is equipped with a control board that allows 24V 3-speed fan operation from a 3-speed wall mounted thermostat. Three compatible 3-speed thermostats are available from First Co.: manual changeover (#T420), auto changeover (#T421), and the all new "Autospeed 24V" (#T200 and #T201). The T200/T201 Autospeed 24V provides maximum comfort and efficiency by automatically varying the fan speed between High, Medium, and Low speeds, depending on room temperature and desired thermostat setting. (See P6. for additional information)

STANDARD FEATURES

- 120V motor, 24V 3-speed fan control
- Electrical service pullout not available on CW-HW four pipe unit
- Factory installed electric heat
- Non-corrosive thermoplastic drain pan, sloped for positive drainage
- Separate compartment for drain connections (allows the use of PVC drain piping)
- Drain pan has female primary and secondary fittings
- Easily accessible 1" filter
- Various optional factory installed valve packages
- Coil connections stub out top of unit

OPTIONAL ACCESSORIES (see Pages 7,8,9)

Optional accessories include 3-speed wall thermostats, wall panels with captive screws (for recessed wall mounting), condensate overflow switch, closet hanger bracket kit, bottom return air kit and various chilled water valve packages.

Standard unit shown
(closet application - front return air)

Unit shown with bottom return air kit
(closet application - bottom return air)

AUTOMATIC FAN SPEED CONTROL

The Autospeed 24V™ Thermostats

(PART #'S T200/T201)

(T200 shown with wall plate)

The new Autospeed 24V™ thermostat (part's # T200 and T201) provides 24V AC single stage temperature control of 2 pipe and 4 pipe fan coil applications. The T200/T201 thermostat offers maximum comfort and efficiency by automatically selecting the appropriate High, Medium, or Low fan speed, depending on room temperature and thermostat temperature setting. This automatic fan speed control not only brings the room temperature to the desired set point quickly, it maintains the room temperature with the most efficient fan speed selection.

Once the desired room temperature is achieved the fan coil operates on low speed for extremely quiet operation. The fan coil control board (which is factory installed in all CW units) is a circuit board that provides control of a 3-speed line voltage fan motor. The control board allows the thermostat to control the fan motor even though, by itself, the thermostat does not have the amperage capability nor the voltage rating capability to control the fan motor.

T200/T201 THERMOSTAT FEATURES

- Compatible with 2-pipe and 4-pipe fan coils: HBC Series, MB Series, HYB Series, and CW Series
- Cycle fan or continuous fan operation
- T200-Manual Heat / Cool changeover switch
- T201-Automatic Heat / Cool changeover switch
- Set points are permanently retained in memory in case of power interruption
- 3-speed fan operation, with speed indicator lights
- Fan speed determination:
 - If room temperature is 4 degrees (F.) off thermostat set point, fan will operate on High speed.
 - If 3 degrees off set point, fan will operate on Medium speed.
 - If within 2 degrees of set point, fan will operate on Low speed.
- One or 3 hour auto override - fan speed defaults to "Auto" mode after 1 hour if the user manually changes to a particular fan speed.
- Large LED digital display
- Allows less expensive 24V control wiring from the fan coil to the thermostat, rather than larger, more expensive line voltage wiring.
- Temperature set range: 64-88 degrees F.
- Adjustable high and low temperature set points
- Selectable fahrenheit / centigrade display
- Power switch turns system off/on
- Requires 7-wire 24V thermostat wire
- No batteries required
- Simple operation
- Mercury free
- Wall plate included

OPTIONAL VALVE CLUSTERS (Factory installed)	
PART #	DESCRIPTION
VALVE CLUSTER:	Chilled Water Coils
9VCWNVM	No valves, stub kit only
9VCW2BVM	2 hand valves
9VCW22BM	2-way, valve body, 2 hand valves
9VCW23BM	3-way, valve body, 2 hand valves
POWER HEAD:	
911-111	24V
VALVE CLUSTER:	Hot Water Coil including Power Head
HW-2WM	2-way, valve body, 2 hand valves
HW-3WM	3-way, valve body, 2 hand valves

**T200/T201
AUTOSPEED 24V™
THERMOSTAT**

**T420/T421
THERMOSTAT**

Optional wall panel
(Recessed wall application)

NOTE:

All models are available with or without factory installed valve clusters. Above are "standard" 2-way and 3-way valve clusters. Contact the factory for other options such as circuit setters, strainers, auto-flow valves, etc.

In keeping with its policy of continuous progress and product improvement, First Co. reserves the right to make changes without notice.

CW-HW Series Upflow Wall / Closet Fan Coils

4-Pipe Chilled Water - Hot Water

(190 - 1190 CFM)

OPTIONS

CABINET RETURN PANEL

Return air panel converts front return air to bottom return air configuration.

90PK4 - CW(X)-HW4-10

90PK4F - CW(X)-HW4-10 foil faced insulation.

90PK5 - CW(X)-HW-12

90PK5F - CW(X)-HW-12 foil faced insulation.

WALL MOUNT BRACKET KIT

Kit allows unit to be mounted directly to the wall.

90PK3 - CW(X)-HW4-12

INSULATION

Foil faced with wrapped edges prevents fiberglass fibers from entering the air stream.

COILS

Chilled water

2,3 and 4 row coils available.

Hot water

1,2,3 and 4 row coils available.

(Contact factory for availability)

WALL PANELS

Framed wall panels are available with return air louvers or solid for bottom return configurations.

Louvered panel: 9PWUCO3L CW(X)-HW4-12

Solid panel: 9PWUCO3S CW(X)-HW4-12

4-PIPE COOLING AND HEATING

Manual changeover - requires thermostat with heat/cool switch.

Auto changeover - requires thermostat with heat/cool/auto switch.

MOTORS

PSC 3-speed

Includes CB500 3-speed control board and 24-V transformer.

115-V single phase 60-Hz

ECM 3-SPEED

Includes 24-V transformer and terminal strip.

115-V single phase 60-Hz

VALVE PACKAGES

Factory assembled and installed inside the cabinet and factory wired.

4-Pipe

2-Way valve w/4-bv - 9VCW42BM

3-Way valve w/4-bv - 9VCW43BM

VALVE ACTUATORS

E50132180 24V

NO VALVES

Stub-out tubing kit only - 9VCWHNVW

FACTORY INSTALLED VALVE PACKAGE ACCESSORIES

CP601 - 1/2" manual circuit setter

CP6011 - 3/4" manual circuit setter

Auto flow control Hays 2517

CP6025 - Pete's plugs 1/4" NPT

CP603 - 1/2" Y-strainer

CP6031 - 3/4" Y-strainer

CP603B - 1/2" Y-strainer w/blow down

CP6031B - 3/4" Y-strainer w/blow down

THERMOSTATS

T-420 manual changeover

2-Pipe/4-Pipe 3-Speed, 24 to 277 VAC, remote sensing available.

T-421 AUTO CHANGEOVER

2-Pipe/4-pipe 3-speed, 24 to 277 VAC, remote sensing available.

T200 MANUAL CHANGEOVER

2-Pipe/4-pipe 3-speed auto speed, 24 VAC, LCD display

T201 AUTO CHANGEOVER

2-Pipe/4-pipe 3-speed auto speed, 24 VAC, LCD display

T426 AUTO / MANUAL CHANGEOVER

2-Pipe/4-pipe 3-speed auto speed, 24 VAC or 110-277, LCD display backlight, setback capability, key pad lockout, local or remote sensing, temperature range limits.

T427 PROGRAMMABLE AUTO / MANUAL CHANGEOVER

2-Pipe/4-pipe 3-speed auto speed, 24 VAC or 110-277, LCD display backlight, 7 day, 4 event, setback capability, key pad lockout, local or remote sensing, temperature range limits.

SS-3 Condensate overflow switch is field mounted to the drain pan.

PIPING PACKAGE OPTIONS

TWO POSITION · MODULATING

Manual air vents are standard and are factory mounted on all chilled water and hot water coils.
All pre-piped on/off or modulating valve packages are factory assembled with sweat connections.

Ball Valves only, No Control Valve

3-Way Valve, No Ball Valves

2-Way Valve, No Ball Valves

3-Way Valve, with 2-Ball Valves

2-Way Valve with 2-Ball Valves

3-Way Valve, with 2-Ball valve and Manual Circuit Setter or Automatic Flow Control, Y-Strainer, PT's

3-Way Valve with 2-Ball Valves and Aquastat

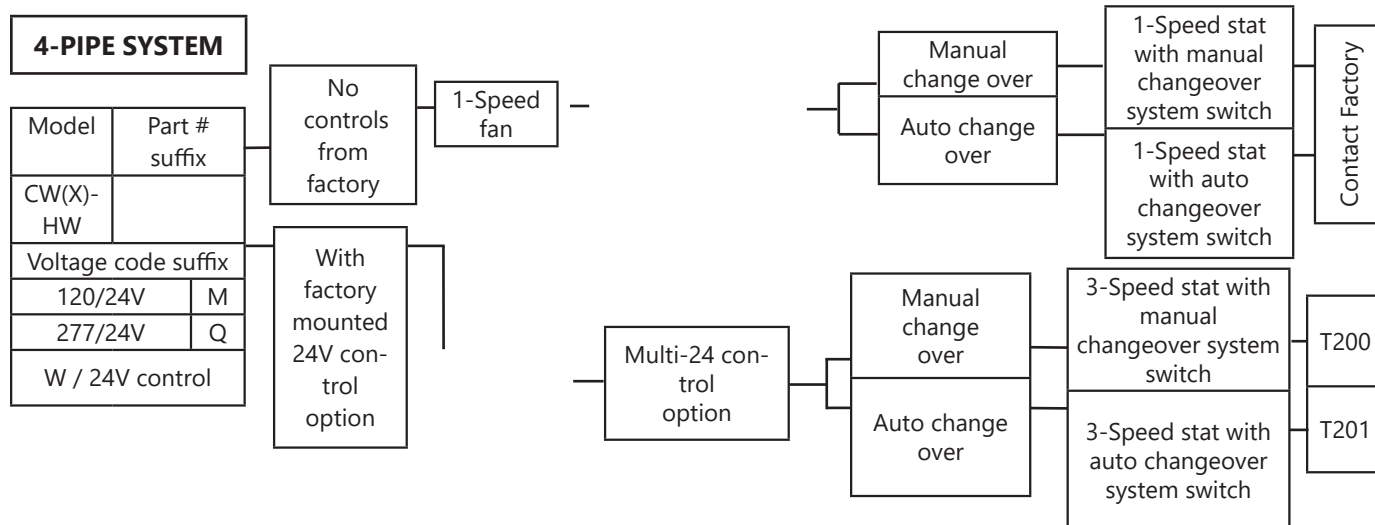

Add Options:

Y-strainers, Pete's plugs, cleanout blow-down, SS hose kits, aqua stats

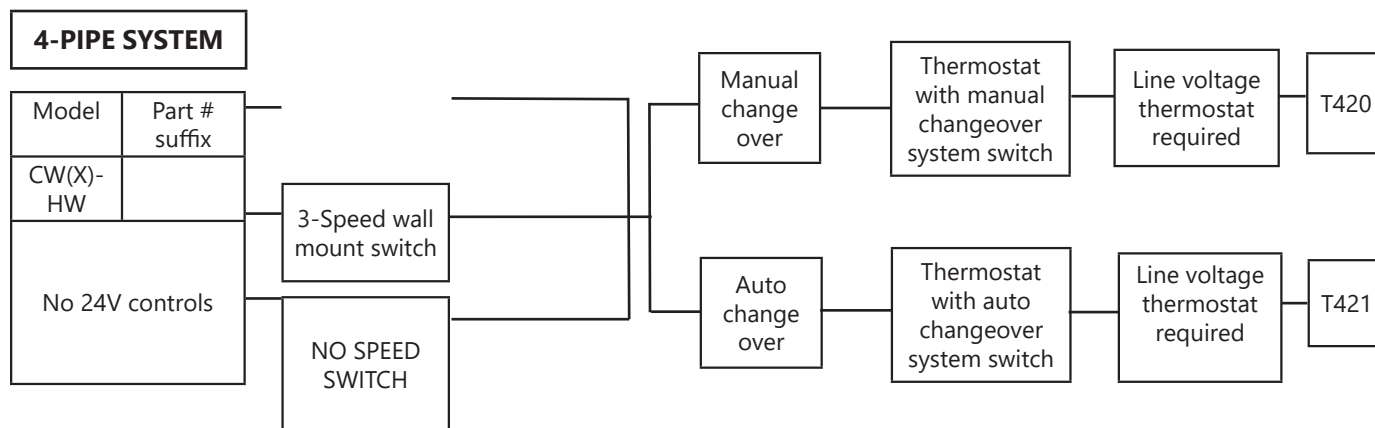

Additional options and configurations may be available. Contact factory for availability.

Valve packages are available as kits or factory mounted on certain products. Contact factory for

CW(X), CW(X)-HW, CWE(X)

GUIDE SPECIFICATIONS

SYSTEM DESCRIPTION

Vertical fan coil units, 2-pipe, 4-pipe or 2-pipe electric heat for closet or wall furred-in applications for single or multi-story buildings. Units shall be completely assembled and complete with water coils, fan, motor, drain pan, and all required wiring, piping, controls and special features.

Water Coils

All coils shall have 3/8-inch copper tubes mechanically bonded to a configured aluminum plate fin. The copper tubes comply with the ASTM B-75. Coils shall be leak tested at the factory to ensure the pressure integrity. The coil shall be leak tested under water to 450 psig for operation to 300 psig. Coil are equipped with two manual air vents for the supply and return lines.

CW(X), CW(X)-HW, CWE(X)

GUIDE SPECIFICATIONS CONTINUED

Valve Package with Automatic Flow Devices (option)

The optional valve package shall contain factory furnished and installed 2-way or 3-way 2-position, spring return, normally open, LEAD FREE, motorized valves rated at 300 psig for 2-pipe or 4-pipe applications. Valve Actuator to be easily detached from valve body with a push button. The ball valves, strainers, and automatic flow controls shall be rated at 600 psig. The automatic flow control valve shall be factory set to a rated flow, and shall automatically control flow to within 10% of the rated value over a 40 to 1 differential pressure, operating range (2 to 80 PSID). Operational temperature shall be rated from fluid freezing, to 225°F. The valve body shall be constructed from hot forged brass UNS C37700 per ASTM B-283 latest revision. For more information pertaining to the automatic balancing valve packages, see literature documentation.

Cabinet

Fabricated from heavy gauge galvanized steel. Large access panels permit full access to internal components. The structural integrity of the cabinets shall remain unaffected by the removal of any or all access panels. All panels shall be insulated with ½" Tuf-Skin RX™, which offers greater sound absorption and better thermal efficiency. Insulation to have a special acrylic coating that's formulated with an EPA registered anti-microbial agent. The insulation meets the erosion requirements of UL 181. It has a flame spread of less than 25 and a smoke developed classification of less than 50 per ASTM E-84 and UL 723. Access for inspection and cleaning of the unit drain pan, coils and fan section shall be provided. The unit shall be installed for proper access.

Basic Controls

Units include the following controls and functions. Provide with a 3-speed circuit board (CB500) with conformal coating (both sides of board) for humidity and condensation protection. Controls include 24V transformer, 15 amp service disconnect, and fan relays factory mounted and wired.

Drain Pan

The condensate pan shall be constructed of corrosion proof material. The bottom of the drain pan shall be sloped on two planes which pitches the condensate to the drain connection. The drain pan shall be flame rated per UL945V-B.

Electrical

The unit control box shall contain all necessary devices to allow heating and cooling operation to occur from a remote wall thermostat.

These devices shall be as follows:

24 VAC energy limiting class II [40 VA] (minimum) transformer] 24 VAC 3-speed control board.

Thermostat connections shall be provided for ease of hook-up to a terminal strip located in the unit's control box.

Electric Heat (CWE only)

Unit shall be equipped with nichrome wire electric strip heaters for total or auxiliary electric heat as specified on equipment schedule.

Heaters shall be protected by an automatic reset safety cutout switch.

Heater capacity shall be as specified on the equipment schedule.

Heaters shall be single phase, 60 Hz for 208, 240 or 277 volts as specified on the equipment schedule.

For total electric heat, unit controls may include a sequenced heating and cooling thermostat.

*For auxiliary electric heat or twilight heat, optional unit controls shall include 2 additional automatic changeover devices.

Filters

One inch filters shall be standard and factory installed.

Indoor Blower Wheels are double width, double inlet (DWDI), forward curved, centrifugal type. They are statically and dynamically balanced for a smooth, quiet operation. The Class I housing is constructed of heavy gauge steel with die-formed inlet cones.

Motors to be multi-speed, 120V, 208-230V, or 277V single phase, 60-Hz, permanent split capacitor (PSC) or electrically commutated motor (ECM) type factory mounted to the blower assembly with rubber isolators or optional ECM with 3 speeds factory programmed.

Wall Panels to be louvered or solid frame type. Panels fabricated of heavy gauge galvanized steel and coated with white epoxy powder finish. Panel to be insulated with ½" Tuf-Skin RX™. Panel to provide full access to all internal components including valve packages.
